# MX Atrium API

Connect to unified financial data

---

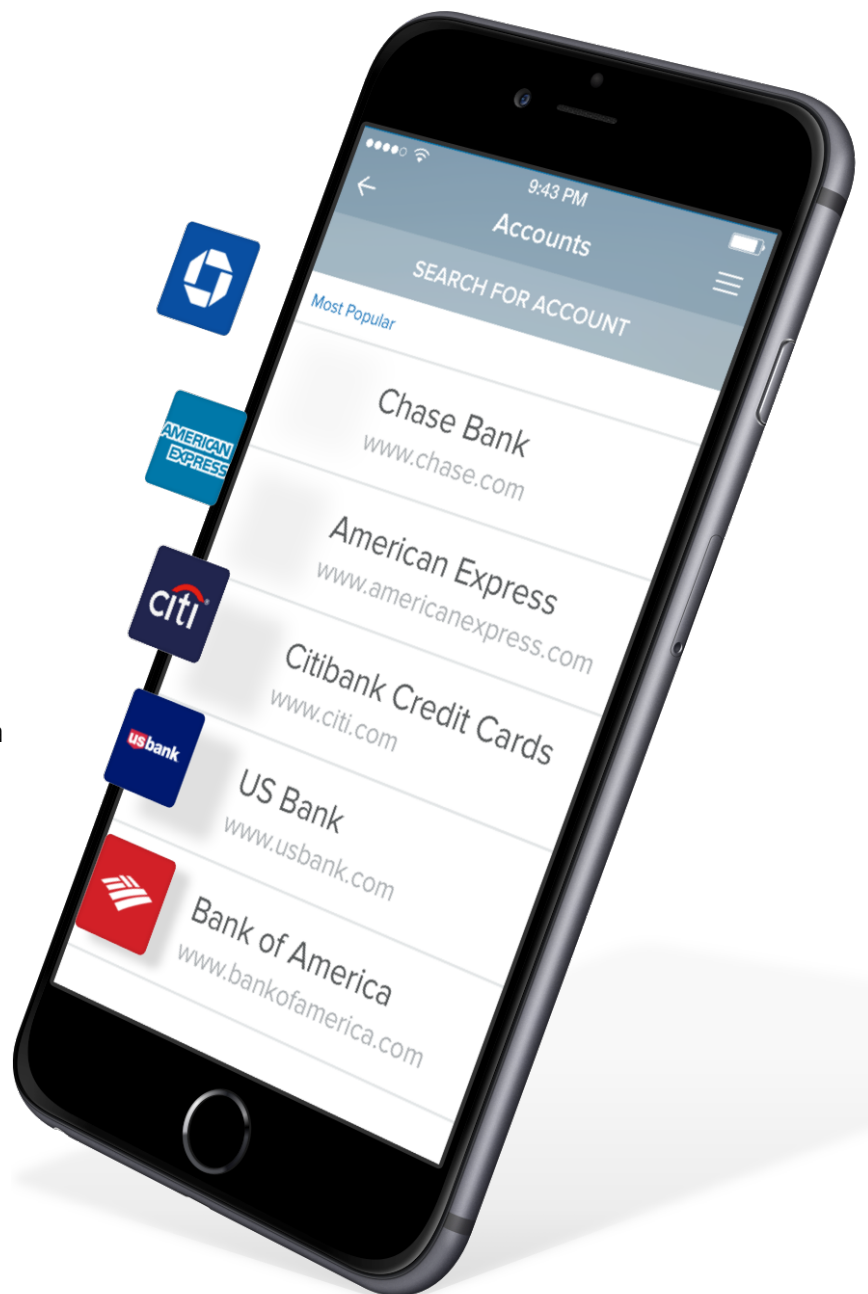

## Atrium by MX

As a builder in financial services, you're looking to save time *and* create powerful apps. The MX Atrium API can help you on both these fronts.

Use our ready-made libraries, view our straightforward documentation, and test-drive the code for free. You can offer your users more than 30,000 connections to financial institutions and cleanse, categorize, and classify all transaction data with the greatest accuracy on the market. Do all this with fintech-friendly pricing and no user limitations.

It's the simplest, most reliable way to get quality banking data.

- **Over 30,000 FI connections**
- **Industry's most accurate data**
- **Startup friendly pricing**
